

AFT - ALUMINIUM FOIL TAPE**Material:**

The tape, consisting of a flexible aluminium foil backing and a layer of acrylic-based adhesive, is perfectly suited for tasks such as sealing, repairing metal, and wrapping pipes. It possesses desirable qualities such as thermal conductivity, resistance to moisture and solvents, as well as heat and light reflection.

**OTHER ADDITIONAL INFORMATION**

Property	Unit	Value	Testing Method
Size	mm	48 x 45	/
Thickness	mm	0.03	PSTC-33/ASTMD3652
Tensile Strength	N/25mm	40	PSTC-31/ASTMD3759
Peel Adhesion	N/25mm	12	PSTC-1/ASTMD3330
Initial Adhesion	#	14	PSTC-6/ASTMD3121
Elongation at Break	%	3	PSTC-31/ASTMD3759
Temperature Resistance	°C	-30~+120	/
