

GET5 & GET10 - 5MM X 8MM X 5 OR 10M GROMMET STRIP EDGE**Description:**

Grommet strip edge roll is designed to protect cables, wires, and tubing from abrasion when passing through metal panels, knockouts, enclosures, and sharp-edged openings. Manufactured from flexible, durable material, it easily fits onto exposed edges to create a smooth protective barrier, reducing the risk of cable damage and improving installation safety.

Ideal for electrical enclosures, fuse boards, control panels, trunking, and metal fabrication applications, edge grommet strip can be cut to the required length for a neat, professional finish. Its flexible design allows it to conform to straight edges, curves, and irregular openings, making it a versatile solution for a wide range of cable management and protection tasks.

**OTHER ADDITIONAL INFORMATION****Product Features:**

- Protects cables from sharp or rough metal edges
- Flexible and easy to install
- Suitable for fuse boards, back boxes, panels, & enclosures
- Built for long-lasting protection

General Information:

- Colour: Black
- Operational Temperature: -10°C to + 90°C
- Material: PVC (Polyvinyl Chloride), Steel
